Involving people with experience of dementia in a systematic literature review about accessing urgent care.

Dr Jemima Dooley, University of Bristol

@DrMimaDooley

People living with dementia supported the literature review by highlighting which aspects were most relevant for them.

7 Alzheimer's Society Service User Review Panels helped set the search strategy

6 people living with dementia and 5 carers helped synthesise the findings

Researchers followed the strategy to search databases, include/exclude papers and extract results

Factors from the literature affecting decisions in urgent care

Topics of discussion in evidence synthesis
